#### **DETAILED ACTION**

1. Claims 69 and 72 are canceled and claim 1, 36, 39, 71 and 73 and 75 are amended in the amendment filed on 08/21/2006.

Claims 1-34, 36-37, 39-68, 71, 73-75 are pending in this application.

# Response to Arguments

2. Applicant's arguments with respect to claims 1, 36, 39 and 71-72 have been considered but are moot in view of the new ground(s) of rejection.

## Claim Objections

3. Claim 37 is objected to because of the following informalities: Claim 37 recites "computer readable medium comprising computer execution instructions for performing the method of claim 36" which is a independent claim not a dependent claim.

Appropriate correction is required.

## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

## MPEP 2106 IV. B.2. (b)

A claim that requires one or more acts to be performed defines a process.

Application/Control Number: 09/925,125 Page 3

Art Unit: 2162

However, not all processes are statutory under 35 U.S.C. 101. Schrader, 22 F.3d at 296, 30 USPQ2d at 1460. To be statutory, a claimed computer-related process must either: (A) result in a physical transformation outside the computer for which a practical application in the technological arts is either disclosed in the specification or would have been known to a skilled artisan, or (B) be limited to a practical application within the technological arts.

4. Claims 1-34, 36-37, 39-68, 71, 73-75 in view of the above cited MPEP section, are not statutory because claims they merely recite computing steps without producing any concrete and useful result and being limited to a practical application within the technological arts. The claim directs to data structure which is non-functional descriptive material. The claims lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material per se. Descriptive material can be characterized as either "functional descriptive material" or "nonfunctional descriptive material." Both types of "descriptive material" are nonstatutory when claimed as descriptive material per se, 33 F.3d at 1360, 31 USPQ2d at 1759. When functional descriptive material is recorded on some computer-readable medium, it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized. Compare In re Lowry, 32 F.3d 1579, 1583-84, 32 USPQ2d 1031, 1035 (Fed. Cir. 1994). Merely claiming nonfunctional descriptive material, i.e., abstract ideas, stored on a computer-readable medium, in a computer, or on an electromagnetic carrier signal, does not make it statutory. See Diehr, 450 U.S. at 185-86, 209 USPQ at 8 (noting that the claims for an algorithm in Benson were unpatentable as abstract ideas because "[t]he sole practical application of the algorithm was in connection with the programming of a general purpose computer.").

#### Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bhargava et al. (US. Patent No. 5,855,019) Patent date: 12/29/1998.

Application/Control Number: 09/925,125 Page 4

Art Unit: 2162

Carino, Jr. et al. (US. Patent No. 6,085,223) Patent date: 07/04/2000.

Lymann et al. (US. Patent No. 6,507,844 b1) Patent date: 01/14/2006.

## **Contact Information**

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Baoquoc N. To whose telephone number is at 571-272-4041, or unofficial fax number for the purpose of discussion (571) 273-4041 or via e-mail Baoquoc N. To@uspto.gov. The examiner can normally be reached on Monday-Friday: 8:00 AM – 4:30 PM, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Breene can be reached at 571-272-4107.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231.

The fax numbers for the organization where this application or proceeding is assigned are as follow:
